

MEVISTO

GEMSTONES MADE FROM HAIR OR ASHES

From life
to eternity.

*"What if the soul lacks the right words to say? Then it will send tears...
But, sometimes there are not even tears anymore. Sometimes emptiness
is all that is left. In these moments,
I just sat there and held my stone in my hands to hold myself up.
Thank you for this token of remembrance and love to which I can cling."*

— Customer testimonial about our Memento Ring Art. No. 800

*"For us, sapphires made of ashes or hair are a sign of appreciation,
respect, and love and a unique memory of someone for whom our love
knows no bounds."*

— Customer testimonial about our Memento Ring Art. No. 320

*"Since I have been wearing this ring, this emptiness in me
is slowly being replaced with joy in life again. The gemstone
gives me an indescribable connection with the beloved person,
who had to depart from us much too early. I am exceedingly
grateful for the wonderful people at Mevisto who made all
this possible in the first place and managed to implement
my ideas. I cannot find the words to describe how much this
means to me. Thank you!"*

*Special moments are
worth preserving.*

“Because love

outlives death.”

A devastating stroke of fate in the family gave rise to the desire for creating a lasting and tangible memory. A memento that makes this life-changing experience comprehensible and that you can carry with you. This search for a beautiful keepsake led to the development of this one-of-a-kind method:

the transformation of hair or ashes into personalized sapphires or rubies. A photo always takes you back to the same situation, the same event.

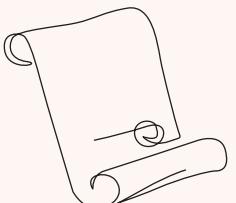

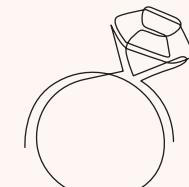

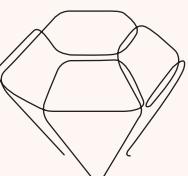

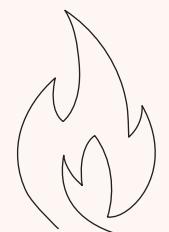

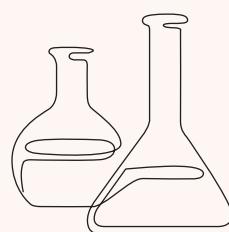

A gemstone evokes memories and makes it possible to move on and grow in your life.

The mission of the family business and its contributors is to give people the opportunity to be with and stay close to their loved ones. Be it as a symbol of fellowship throughout a shared lifetime or in memory of the departed.

How the process works.

*“Because this is
our calling.”*

Ashes/hair

Just 50 g ashes or 10 g of hair are enough for us to create keepsakes for all eternity. Aside from combining ashes with hair, we can also accommodate requests for blending humans and animals in one gemstone.

Extraction

We employ a chemical process to extract all the elements that set us apart and make us special. These elements are then prepared for their incorporation into the crystal structure.

Genesis

At over 2,300 °C, aluminum oxide blends with the elements to form a sapphire or ruby. As we monitor the process at every stage, we can create something that will stay on earth at its shiniest best.

The gemstone

The freshly emerged crystal is now cut according to the highest quality standards. Each facet is processed at least four times - from coarse pre-cutting to fine polishing. Our gemstone cutters invest an average of 700 peaks through the magnifying glass until the facets interact in perfect harmony. Tremendous patience and skill lead to the creation of shiny and unique specimens crafted by hand.

Jewelry

If requested, the polished gemstone can be set into a piece of jewelry. Whether the stone is worn close to the heart as a pendant or as a ring on the finger is entirely up to the wearer's personal preferences.

Certificate

Each gemstone is accompanied by a certificate that summarizes all the characteristics that have emerged. The fact that several elements of humans or animals can be detected in our personalized gemstone is unique in the world and has been proven scientifically by various universities.

The color variety and characters of the gemstones.

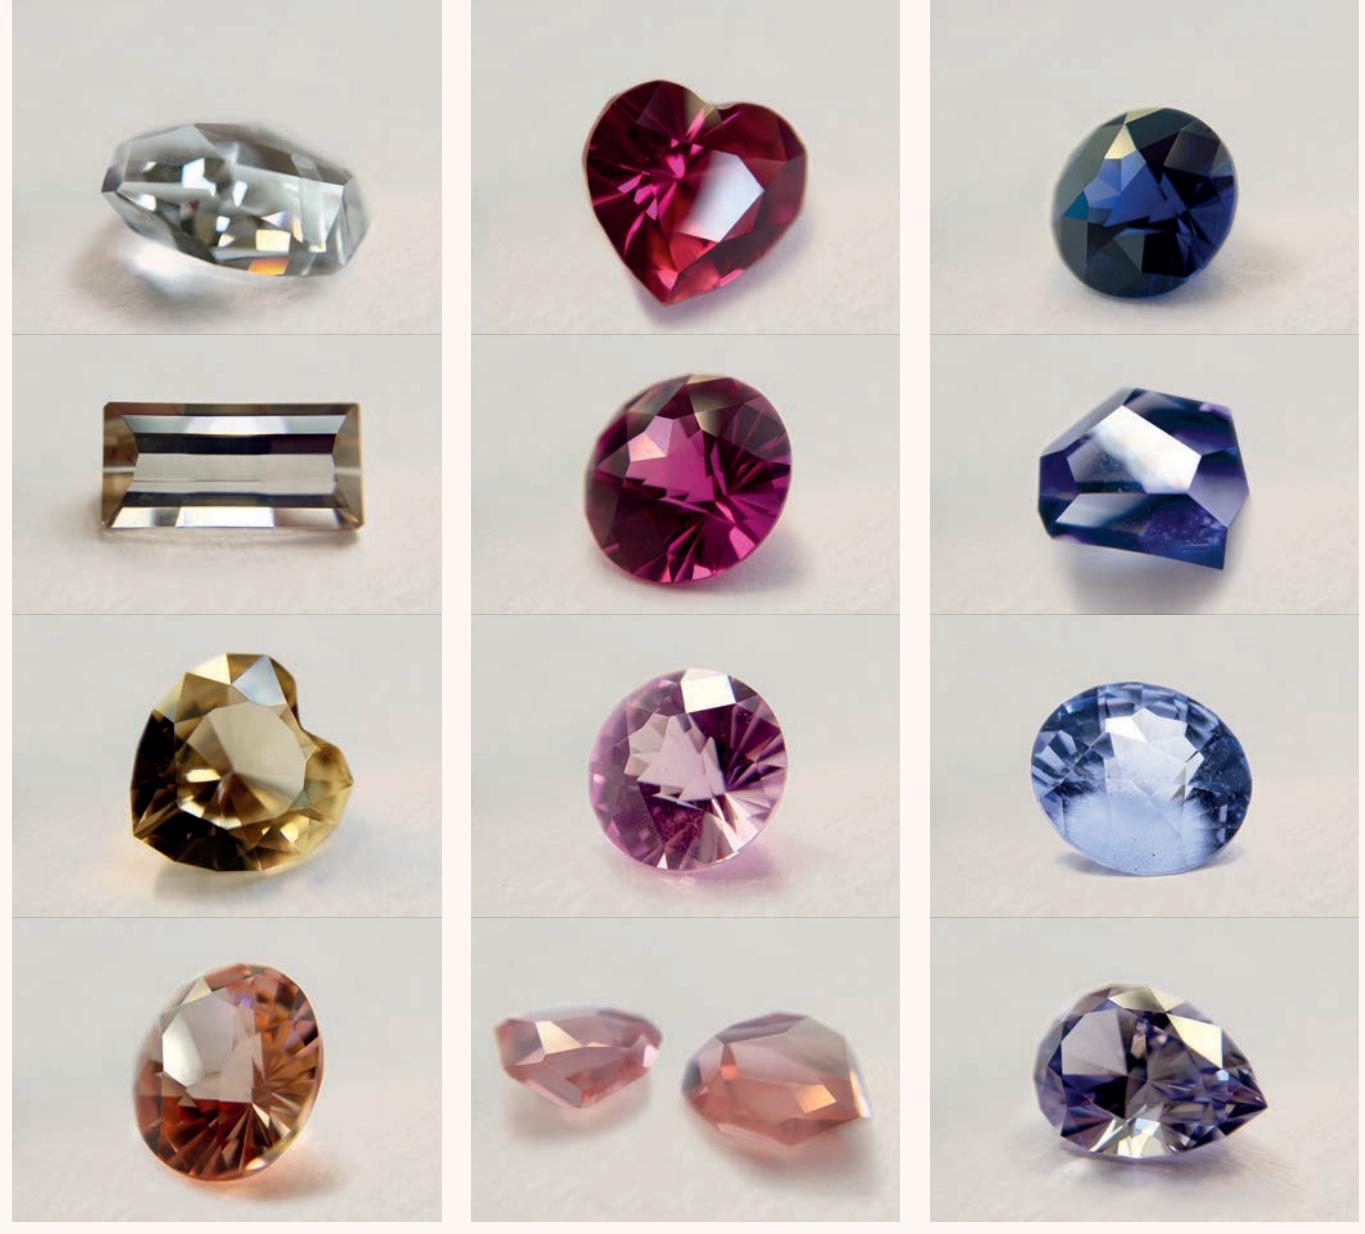

*“Because no one
of us is like another.”*

Every gemstone boasts its own character. While we are all made up of the same elements, the composition of these elements varies. Our individual lifestyles and countless personal factors influence the intensity of the colors and possible inclusions in each sapphire or ruby.

A symphony of elements that plays a different melody in each stone.

Customers can generally select between the colors red, blue or natural for their personalized gemstones. However, how light or dark the stone will turn out to be is impossible to predict.

Natural: from colorless, champagne, and peach to brownish

Red: from colorless, pink, and light red/orange to dark red

Blue: from colorless, lilac, and light blue to dark blue/purple

It is also possible to create *multiple gemstones*.

Memories are not told by individuals, but are shared by many people and want to be preserved. This is why we also offer the option to have more than just one gemstone manufactured.

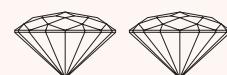

It is generally possible to realize combinations of several colors and cuts. However, if customers request several gemstones of the same color, it is possible for us to pass on a discount on the total amount of the gemstones. Even if the discount can only be granted on the gemstone, customers can pair any jewelry setting with their gemstone. The prices quoted for the jewelry in this catalog include gemstone and gold setting. The online shop of our website features a configurator that helps with calculating the prices. This offer is valid for the year 2024.

The aggregate of these sapphires constitutes the entirety of the elements. You can see that together they depict a fascinating color gradient.

The tale of Simone and Alexander.

“Because I miss your laugh.”

“The very last moment we were blessed to share with each other... Alexander said to me last night, 'Mom, you are so beautiful!', and then I said to him: 'But Alexander, I'm already in my pajamas and without make-up...', to which Alexander responded, '...but mom, it doesn't matter, you're so beautiful!', those were almost the last words we exchanged.

One thing that is exceptionally important and healing to me is to remind myself again and again of the profound connection we had and will keep having forever. What I mean is that the love we had for each other will never be lost. The certainty that we remain connected in our love props me up on days when I am feeling down.” Simone from Love in the Heart.

The goal Simone pursues above all others is to take grief and death out of the taboo zone and to lovingly accompany the life of the bereaved and their relatives in these difficult times with her texts, thoughts and active assistance.

www.liebe-im-herzen.com

A sapphire with the Forget-me-not cut set in the pendant Art. No. 531 gives Simone the feeling that a little piece of Alexander is with her at all times.

“You are allowed to be sad. You are even allowed to still be sad after 10 years, as that is now a part of you. But, I also want to demonstrate that there is a lot of wonderful life yet to live. Everybody can get there.”

“To me, it is a miracle that my follow-up miracle springs to life every day. I am filled with joy every day when he opens his eyes and laughs at me. For someone else, this may be just a matter of course, but for me it is already a beautiful day.”

On the top, the cut is plain, with only a panel allowing you to see inside the sapphire or ruby. What cut could there be that fits our loved ones better? On the back, the interplay of the polished and unpolished surfaces creates the image of a flower. While making the flower less easily visible, a dark gemstone will reveal surprises when struck by the right light.

The wedding of Bernhard and Katharina.

This cabochon sapphire, called Pure Round, fits perfectly into this red and gold setting. While designed as a wedding ring for everyday life, it is anything but ordinary.

Meanwhile, the family ring has come to adorn Katharina's hand instead of her wedding ring.

*Because joy is
more than a
moment in time.*

“... and I said yes!”

“On the morning of our wedding, my husband gave me a very special gift. One that I would never have expected. A sapphire crafted from strands of hair taken from our heads and that of our children. I find that this gorgeous ring symbolizes our love, our connection, and our trust for each other. When times are tough, it reminds me of the beautiful moments we have shared. It allows me to unite with all my loved ones and keep them with me at all times. For me, this ring is the most beautiful gift I have ever received. And, one day, I will pass it on to my daughter.”

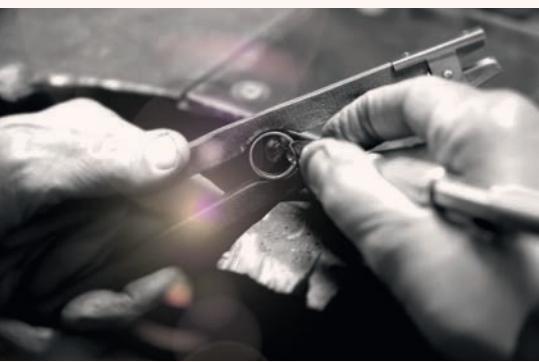

The art of gem cutting requires a great deal of patience and accuracy. For us, it is more than just a gemstone. We know that for someone, this stone means the world.

Information about Mevisto's *jewelry.*

Each piece of jewelry can be selected in all color combinations. We work with 18 carat white, yellow or red gold. The skin tone is highly indicative of which gold color will look good. If your skin tone is rather pink, red and white gold would be a good fit. An olive or yellow skin tone is complemented perfectly by white and yellow gold.

The chart provides an overview of the ring sizes. Once you have made your pick for a ring, make sure to specify it in your order.

We work with a select group of goldsmiths from our region. Local sourcing and sustainability are close to our hearts and are the defining mark of our manufactory.

Our stone cutters look through their magnifying glasses up to 700 times for each gemstone.

My child, my wingman, my partner.

“For my soul dog.”

“At the time, I was wondering: do I need a place or an object to mourn him? It became clear to me that I should have a piece of jewelry made from Kurti's ashes. A Google search led me to Mevisto's website. The first thing that drew me to them was the phone call I had with them. The second thing was their assurance that I could drop by any time. And, the third thing was the fact that they let me in after I drove 800 kilometers only to find their doors closed because of a holiday. One month later, I picked it up. When the stone is not there, something is missing. I have not taken it off yet.”, says Pascal L.

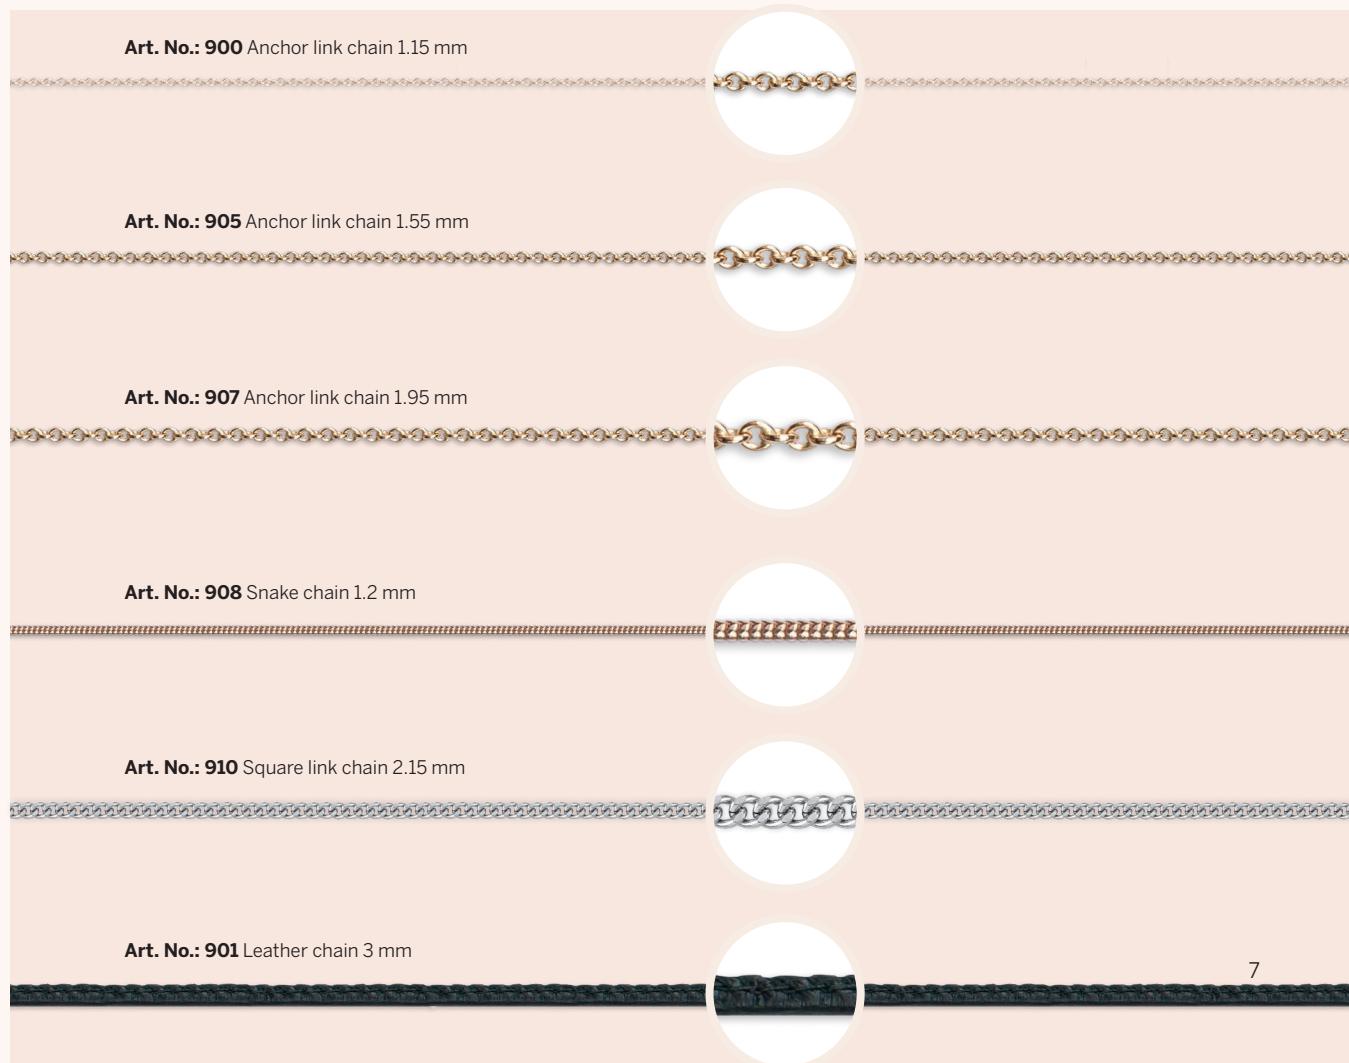

Kurti was at Pascal's side for sixteen years. A soul dog whose loss has touched a great many people.

“Kurti gave me everything you would expect from a good partnership. Some people find it difficult to understand that you can feel such deep-seated sadness for a dog. For me, it was the worst thing that has happened to me in my 40 years.”

Kurti's ashes have been transfigured into two sapphires. A blue Wild Beauty, the model 401, hangs very close to Pascal's heart. A blue sapphire, given the Royal Crest cut, was incorporated into an elaborate ring.

The chains

The chains are available in every gold color. Please indicate the gold color when placing your order.

A great fit for gemstones up to 4 carat would be, for example, an anchor chain article no. 900. For larger gemstones, we recommend a stronger chain.

* This means that the chain has an intermediate eyelet that allows for variations in length.

Regarding it as a labor of love, we try to cultivate endangered plants that are native to the region.

Aside from offering the deceased a final resting place, this wonderful and lavish place also provides a habitat for flora and fauna.

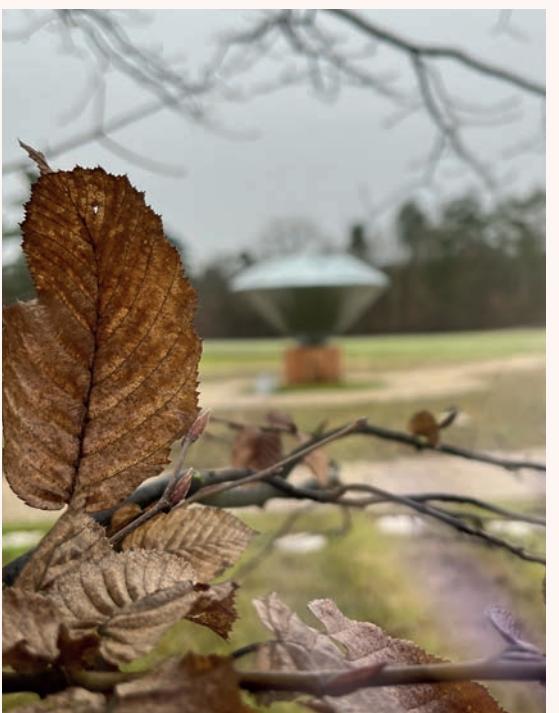

A funeral package, at the Stone of Eternity.

This one-of-a-kind place at the cemetery in St. Martin, Linz, bears the name "Stone of Eternity" and offers a dignified final resting place in an area spanning roughly 2000 m².

Upon request, ashes not used for the production of gemstones (left-over ashes) can be interred in one of the urn graves. As a Mevisto customer, this service is available to you free of charge for 10 years. Thanks to our collaboration with Linz AG, our vision of a gemstone funeral has now become reality. Adorning the center of a flower meadow and surrounded by industrious bees, a gemstone sculpture embodies the eternal circle of life. Bright-colored wild flowers are hemmed in by urn graves, which can also be reserved to serve as family urn graves. A visit to this magnificent cemetery is possible at any time.

Every time you visit the cemetery in St. Martin, you will be able to see glorious, and almost trusting, wildlife.

Whether you are afraid of loss or entertain the idea of having a gemstone made afterwards ... our safekeeping option has you covered.

Safekeeping of the elements extracted from ashes or hair.

If requested, we will extract and store additional elements free of charge. This allows us to manufacture additional gemstones at a later time. The elements extracted from the ashes are stored under special conditions and can be kept in this way for up to five years. The secured elements can be used at any time for the production of a new, personalized gemstone. Since the extracted elements remain a company secret, the elements are not handed over. We cannot guarantee that other gemstones will receive the same shade of color.

Pre-arrangements

Dealing with the topic of funeral arrangements ahead of time will ease the burden of the bereaved as it allows them to focus their attention entirely on their grieving process.

At Mevisto, we offer you the opportunity to set down in writing your own ideas for the memorial service and the funeral. This can be done in the form of a declaration of intent, which also includes the option of a gemstone burial. Not only can you choose the gemstone yourself, but you can also pick its color and cut. In addition, you can specify whether the gemstone should be set in a piece of jewelry and who may receive this keepsake.

Refer to our website for additional options regarding financial and organizational pre-arrangements.

Financing

We provide support in the financing of a gemstone by collaborating with financing partners and offering the possibility of installment purchases. This financing option makes it possible to realize the wish for a memento without having to bear the total cost immediately.

Besides the offer to pay in installments, we offer additional methods of payments in the online shop on our website. The staff of our in-house sales department will be happy to answer any additional questions you may have.
